EDUCATION

Xi'an Jiaotong-Liverpool University

Suzhou, China

Major: Financial Mathematics, expected to earn a Bachelor of Economics

Sep. 2022 – Jul. 2026

University of Liverpool

Liverpool, UK

Major: Financial Mathematics, expected to earn a Bachelor of Science

Sep. 2022 – Jul. 2026

- **GPA:** 80.33 First Class, **WES GPA:** 3.95/4.0
- **Scholarships:** University Academic Excellence Award (Freshman and Sophomore years), University Academic Achievement Award (Junior year)
- **Core Courses:** Macroeconomics, Microeconomics, Probability & Statistics, (Multivariable) Calculus, Linear Algebra, Differential Equations, Matlab, Econometrics, Financial Mathematics, Finance, Financial Management, Stochastic Processes, Numerical Analysis, Java

EXPERIENCE

Sina Weibo

Beijing, China

Data Analysis Intern

July. 2025 – Sep. 2025

- **Data Processing and Evaluation:** Cleaned and integrated ESG data for A-share & CSI 800 constituents using Python, developing a data quality framework based on dimensions like coverage rate and missing rate to guide sourcing decisions.
- **Methodology Research:** Analyzed ESG rating methodologies from leading providers including Zhiding and Refinitiv. Compared their model frameworks, weighting algorithms, and scoring logic, culminating in internal research conclusions.
- **Model Replication:** Replicated the Zhiding ESG rating model. Implementing a calculation pipeline from 200+ raw indicators to final scores, involving standardizing indicators, applying industry weights, and designing a coverage penalty mechanism.

36Kr

Remote

Data Analysis Intern

May 2025 – Jun. 2025

- **SQL Development & Data Analysis:** Designed and optimized database schemas and complex queries, leveraging window functions for efficient data processing. Solidified technical foundations through consistent practice on platforms like LeetCode.
- **User Growth Metrics Analysis & Forecasting:** Developed a predictive model for the core business metric—Daily Active Users (DAU). Built a user retention decay model using a baseline-day approach based on historical new user retention data. Improved forecast accuracy by fitting retention curves and adjusting for temporal patterns.
- **Data-Driven Business Insights:** Systematically integrated the complete analytical process and model results into Excel to deliver statistical forecasts and error rate analysis for DAU. Mastered data source structures through event tracking design and data quality assessment.

Chuangyuan Futures

Futures Research Intern, Research Department

Jan. 2024-Feb. 2024

- **Commodity Data Management:** Aggregated global supply-demand and weather data to analyze futures price trends. Created visualizations that supported researchers in producing fundamental analysis reports.
- **Commodity Research and Analysis:** Developed a multi-dimensional analysis framework for agricultural commodities (soybeans, cotton) covering planting, policy, and consumption factors. Provided analytical basis for hedging strategies through real-time data synthesis.

AIA Hong Kong

Finance Research

Aug. 2023

- **On-site company visit:** Observed the corporate culture, work environment, daily operations, and core business of AIA.
- **Gained insights into the financial industry:** Familiarized with basic insurance knowledge and the different types of insurance offered in Hong Kong, especially AIA's solutions.
- **Research outcomes:** Participated in a hands-on case study. Engaged in a business analysis competition, co-authored a proposal to address client needs, and received the "Most Popular Award."

PUBLICATION

Under review:

[1] Qiang Niu, Wenhui Ni , Mianmian Chen, **Qianzhao Li**. (2025). An investigation of Chebyshev Spectral Methods for American Option Pricing. *International Journal of Computational Methods*.

PROJECTS

University Summer Research (SURF) - Global Analysis of ESG Accounting Positions *Jun. 2024 – Aug. 2024*

- Investigated global job market trends for ESG accounting roles across China, the US, the UK, and Australia.
- Utilized web scraping techniques to collect large volumes of job postings from multiple recruitment platforms, including job descriptions, requirements, salary ranges, and company details.
- Cleaned and processed data in Excel, categorized information using keyword analysis, and visualized findings via bar charts.
- Drew conclusions regarding job descriptions, skill requirements, and market demand for ESG accounting positions and presented results in a research poster.

University Summer Research (SURF) - Deep Learning Image Recognition Project *Jun. 2023 – Aug. 2023*

- Developed an image recognition system using Python to identify answers on multiple-choice tests, significantly improving grading efficiency with over 97% accuracy in practical application.
- Collected image data of the four multiple-choice options (A, B, C, D) and a fifth category (Others), and trained models using existing neural network architectures.
- Conducted experiments using a single-variable approach and compared multiple recognition networks. Selected the best-performing neural network model for optimal accuracy.

CAMPUS ACTIVITIES

Quantitative Finance Club *Nov. 2023-Present*

Core Member

- Organized data on CSI 300 index futures and Dalian Commodity Exchange options and futures into SQL databases, expanding the data analysis capabilities within the university. Also learned basic web-scraping techniques.
- Acted as a tutor during the revision week, answering questions from classmates about various courses. Also shared problem-solving techniques, improving patience and communication skills.
- Replicated futures roll strategies and related quantitative trading strategies, enhancing Python skills and becoming familiar with trading rules and models.

Xi'an Jiaotong-Liverpool University Student Union *September 2022- June 2023*

Core Member of the External Relations Department

- Secured collaborations with over 120 merchants during the tenure, providing benefits and discounts for students.
- Planned two major campus exchange events, coordinating internal and external resources to facilitate practical activities.
- Hosted an inter-university summit, inviting 5 Sino-foreign cooperative and neighboring universities for collaboration and exchange, with total participation reaching 100 attendees.

SKILLS

- **Technical Skills:** Python (Proficient), Matlab(Proficient), Excel (Microsoft Office Specialist: Excel Associate), PowerPoint(Microsoft Office Specialist: PowerPoint Associate), Photoshop(Adobe Certified Ps Professional)
- **Languages:** Native Mandarin, Fluent in English, Basic proficiency in Spanish
- **Interests:** Writing, Erhu (Level 10), Sports
